

Reported Incidences of Parasitic Infections in Marine Mammals from 1892 to 1978 (Paperback)

By John Felix

Zea Books, United States, 2014. Paperback. Book Condition: New. 279 x 210 mm. Language: English . Brand New Book ***** Print on Demand *****. This book is a comprehensive list of parasites reported from marine mammals, based on the scientific literature published between the late 1800 s and 1978, including sources of information, geographical locations of the host/parasite, and possible synonyms suggested by the original sources. It covers the parasite groups Acanthocephala, Acarina, Anoplura, Cestoda, Nematoda, and Trematoda, and the host orders Pinnipedia (seals, sea lions, walruses), Cetacea (whales, dolphins), and Carnivora (sea otters). It provides a valuable resource for stranding response personnel, aquatic animal veterinarians, marine biologists, and professional parasitologists, and is a critical aid to our further understanding of the intriguing interactions between the marine mammals and their underwater passengers. ISBN 978-1-60962-042-4.

Reviews

Complete guideline for publication fans. I am quite late in start reading this one, but better then never. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Llewellyn Terry**

A whole new eBook with a brand new viewpoint. Yes, it is perform, continue to an interesting and amazing literature. You wont truly feel monotony at whenever you want of the time (that's what catalogs are for concerning should you ask me).
