Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Cross-border consolidation of financial institutions within Europe has been relatively limited, possibly reflecting efficiency barriers to operating across borders, including distance; differences in language, culture, currency, and regulatory/supervisory structures; and explicit or implicit rules against foreign competitors. EU policies such as the Single Market Programme and the European Monetary Union attenuate some but not all of these barriers. The evidence is consistent with the hypothesis that these barriers offset most of any potential efficiency gains from cross-border consolidation. Banks headquartered in other EU nations have slightly lower average measured efficiency than domestic banks and non-EU-based foreign banks.
