Prayer fits the phenomenon because so many people believe in it without being able to demonstrate the slightest effectiveness. Has anyone ever done or even considered a statistical analysis of its success or failure rate, or heard of such a study? Of course not. This would be an affront to the faithful. In the event that providence has been favorable they claim their prayers have worked. Or perhaps they say it was a miracle, which would be God changing his mind about his grand plan. When an event remains negative, they say nothing, but none-the-less continue to believe in the fantasy. A miracle is a positive event for which we may not be able to derive a reason, but that does not mean that the event does not have a simple explanation if we were able to understand all of the circumstances.
